**816 Butternut**

Pkt., 15c;  $\frac{1}{2}$  oz., 35c; oz., 65c;

$\frac{1}{4}$  lb., \$1.75;  $\frac{1}{2}$  lb., \$3.00

$\frac{1}{4}$  lb., \$1.35;  $\frac{1}{2}$  lb., \$2.00

(90 days.) Excellent variety. Has the high quality of the Hubbard Squash and yet matures in a convenient size, weighing from 3 to 4 pounds. Matures earlier than Hubbard, and is therefore more apt to ripen. Excellent flavor. The flesh is extremely thick, dry and sweet, of smooth texture, entirely free of strings.

**787 New Zealand** Pkt., 10c; oz., 35c;  $\frac{1}{4}$  lb., 85c

(55 days.) An excellent variety to grow for summer greens as it thrives in hot, dry weather. The plants are very large and spreading and branch freely, producing great quantities of small, thick, fleshy leaves. Pick off the tender new leaves at the tips of the branches, and the plants will continue to develop new growth all summer and fall. The seed is slow to germinate and should be soaked 24 hours before planting.

## Squash

*A packet of seed will plant 6 to 8 hills; 1 ounce 25 hills; 5 to 6 pounds per acre.*

### Summer Squash

**811 Yankee Hybrid**

(50 days.) (All-America Award.) It is the earliest of all Squash, and actually produced twice as many fruits on the first picking as the next best kind, but the total yield was greater. They are a true straight neck type, with a clear waxy appearance that makes them very attractive.

**803 Early Yellow Prolific**

(50 days.) (All-America Winner.) A bush type, probably the most prolific of the yellow summer Squashes. Frequently yields a dozen or more fruits per plant over the entire season. Fruits straight, smooth, of an appetizing cream color when best for market. Firm and useable when only a few inches long.

**801 Caserta**

(50 days.) Extra early, prolific Cocozelle Squash. It ripens as early as any variety and it yields heavily all through the season. The coloring is unusual, light glossy green, mottled with darker spots. We think Caserta's flavor is far superior to most yellow summer Squashes. Profitable for roadside stands and fine for the home garden.

**809 Zucchini (Dark Green)**

Pkt., 10c; oz., 35c;

$\frac{1}{4}$  lb., 85c;  $\frac{1}{2}$  lb., \$1.25

**800 Cocozelle (Long Type)**

Pkt., 10c; oz., 35c;

$\frac{1}{4}$  lb., 85c;  $\frac{1}{2}$  lb., \$1.25

(65 days.) A bush Vegetable Marrow. Fine flavored. To be at their best, they should be picked when young, not over 10 to 12 inches long and 2 inches in diameter. Fruits long, straight and slender, with a dark green base color and stripes of lighter green.

### Winter Squash

*A packet of seed will plant 3 to 4 hills; 1 ounce 15 hills; 3 to 4 pounds per acre.*

Pkt., 15c;

oz., 45c;  $\frac{1}{4}$  lb., \$1.20;  $\frac{1}{2}$  lb., \$1.75

(105 days.) Our special strain is carefully examined for type, tenderness and color of the flesh. The real value of this strain of Squash to the grower is its fine keeping quality—better still, the fact that this Squash brings three to four cents more per pound on the market as compared with other Blue Hubbard Squash.

**828 Table Queen or Acorn**

Pkt., 10c; oz., 35c;

$\frac{1}{4}$  lb., 85c;  $\frac{1}{2}$  lb., \$1.25

(80 days.) This is also known as Des Moines. A vinous variety of excellent quality that is highly popular for individual baking. The fruits are acorn-shaped, about 6 inches long, 4 $\frac{1}{2}$  inches in diameter. They are sharply ribbed and dark, glossy green. ### Winter Squash—Continued

 (80 days.) All-America Award. This is a bush table queen Squash. Its outstanding characteristic is the fact that it is a bush type and its economy of space when planted in home gardens and closer plantings when produced by market growers.

Fordhook Giant

*A packet will sow 15 feet of row; 1 ounce 75 feet; 4 to 5 pounds per acre.*

**257 Fordhook Giant** Pkt., 10c; oz., 35c;  $\frac{1}{4}$  lb., 70c;  $\frac{1}{2}$  lb., \$1.15

 (55 days.) It is a big improvement over the Lucullus varieties; the leaf is green and curly. It also has a much better flavor than the Lucullus sorts.

### Swiss Chard

*A packet will sow 15 feet of row; 1 ounce 75 feet; 4 to 5 pounds per acre.*

#### **Queens (New). Large, Remarkably Solid Fruit.**

Pkt., 20c;  $\frac{1}{2}$  oz., 60c; oz., \$1.10;  $\frac{1}{4}$  lb., \$3.00  
 (75 days.) This new second-early Tomato is the result of a cross between Valiant and Rutgers and ripens midway between them. The large smooth fruits are unusually solid and firm with thick walls, small seed cavities and meaty interiors. Mild in flavor, sweet and very delicious to eat, Queens will be specially popular with home and market gardeners, and seems well adapted for green wraps. Although somewhat open in growth, the vines are vigorous and yield well.

#### **888 Stokesdale. Good Yielder—Fine Fruit.**

Pkt., 15c;  $\frac{1}{2}$  oz., 50c; oz., 90c;  $\frac{1}{4}$  lb., \$2.50

The Tomatoes are medium in size, smooth as an Apple, with scarlet color and firm red flesh of fine quality. A dependable and well-known variety. We are proud to offer Certified seed.

#### **846 Bounty** Pkt., 20c; $\frac{1}{2}$ oz., 75c; oz., \$1.25; $\frac{1}{4}$ lb., \$3.50

(65 days.) Extra Early—Smooth and Solid. Bounty is an extra early red globe Tomato. Bears good yields of well shaped fruit, free from dark green at stem end. Has a pleasing flavor, depth, smoothness, and firmness of fruit. In Tomato variety tests, Bounty outyielded other early varieties.

#### **870 Sunray** Pkt., 15c; $\frac{1}{2}$ oz., 65c; oz., \$1.10; $\frac{1}{4}$ lb., \$3.00

(80 days.) (New.) Wilt-Resistant Jubilee Type. Their sweet mild flavor and handsome appearance have won many gardeners to the yellow-orange Tomatoes. Sunray is resistant to fusarium wilt and is superior even to Golden Jubilee, which it replaces. It produces large yields of fine, smooth fruit, very firm and solid.

**825 Hubbard (True Original Strain)** Pkt., 10c;  
 $\frac{1}{2}$  oz., 30c;  $\frac{1}{4}$  lb., 85c;  $\frac{1}{2}$  lb., \$1.30  
 (100 days.) Hard, tough, smooth shell of dark green color, and very rich, fine grained, tender flesh. Whether fruits grow large or small, they are equally desirable and there is no better sort to store for winter use.

### Tomatoes

*A packet of seed produces about 150 plants; 1 oz. about 2000 plants;  $\frac{1}{4}$  lb. per acre. Tomatoes contain lots of nitrogen; go easy with fertilizer on the plant bed.*

**884 Pritchard** Pkt., 15c;  $\frac{1}{2}$  oz., 55c; oz., 90c;  
 $\frac{1}{4}$  lb., \$2.50

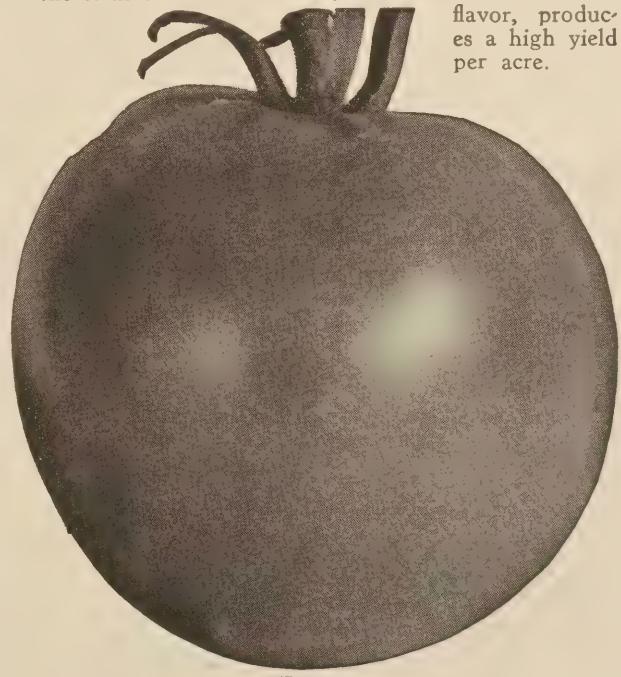

(Certified Seed.) Gold Medal Winner. (78 days.) It is fusarium and nail-head-rust resistant, has a vigorous vine and smooth, deep red, thick-walled meaty fruit. It's a good table Tomato, a good canner, and a good slicer, well adapted to your home garden.

 $\frac{1}{4}$  lb., \$2.50

Is noted for its extreme solidity, deep globe type and productivity as well as its disease resistance—being exceptionally vigorous and healthy. Ripens a beautiful scarlet-red, well up to the stem—profitable for gardeners and shippers.

**886 Rutgers** Pkt., 15c;  $\frac{1}{2}$  oz., 55c; oz., 90c;  
 $\frac{1}{4}$  lb., \$2.50

(Certified Seed.) (80 days.) This is being used very extensively in Ohio and Michigan. It produces well on soils low in nitrogen. It maintains the size of its full fruit throughout the picking season. Similar in shape to Marglobe, except that they are more flat on the stem end. It is of exceptional red flesh color and flavor, produces a high yield per acre.

Its remarkable smoothness and uniformity, large size, handsome deep shape and rich red color inside and out make it the favorite of more growers every year. The thick-walled fruits have solid red flesh, and color beautifully all over with few cracks or scars. The quality is sweet and rich in flavor. The healthy vines have a free-setting habit, producing astonishing crops from early mid-season right up until frost.

**845 Bonny Best** Pkt., 10c;  $\frac{1}{2}$  oz., 45c; oz., 80c;  $\frac{1}{4}$  lb., \$2.25 (73 days.) An excellent sort for home and market. The fruits ripen only a week later than Earliana.
